

ARIN JOSHI

Software Engineer | Full Stack Developer | React.js Specialist | SDE-1
+91 8290279001 | thakarakinjoshi@gmail.com | arinjoshi.netlify.app | linkedin.com/in/arinjoshi | Ahmedabad, Gujarat, India

PROFESSIONAL SUMMARY

Results-driven Software Engineer (SDE-1) with 3+ years of experience designing and shipping scalable, high-performance web applications using React.js, TypeScript, Node.js, PHP, Laravel, and the MERN Stack (MongoDB, Express.js, React.js, Node.js). Specialized in real-time WebSocket-driven gaming platforms, full-stack product development, legacy PHP to React.js modernization, AI-powered feature delivery, RESTful API and GraphQL integration, and end-to-end Agile delivery. Consistently produced measurable impact: 30% UI latency reduction, 40% faster development velocity, 35% fewer re-renders, and 25% page load improvement across production systems. Proficient in AI-assisted development using Cursor AI, Google AI Studio, and Antigravity.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, Java, HTML5, CSS3, Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, Context API, React Hooks, Tailwind CSS, Material UI, SASS, Responsive Design, Figma

Backend and APIs: Node.js, Express.js, Laravel (PHP), REST APIs, GraphQL, WebSockets, JWT Authentication, OAuth 2.0, Supabase

Databases and Cloud: MongoDB, MySQL, PostgreSQL, Firebase, Supabase, AWS (EC2, S3), Docker, CI/CD Pipelines, Vite, Webpack, Git, GitHub, Jira

AI and Dev Tools: Cursor AI, Google AI Studio, Antigravity, Postman, DSA, System Design, OOP, SOLID Principles, Design Patterns, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | Aipxperts - Ahmedabad, Gujarat

Feb 2026 - Present

- Building and enhancing a U.S.-based freelance marketplace and business growth platform (Legiit) serving digital marketers, entrepreneurs, and agencies using PHP, Laravel, React.js, and MySQL to develop scalable, production-ready features.
- Led modernization of legacy PHP applications by migrating pages to React.js, creating highly responsive and user-friendly interfaces with improved UX/UI design that increased user engagement and overall platform efficiency.
- Implemented AI-powered platform features, handled complex business logic, optimized MySQL database queries, and delivered third-party API integrations as maintainable production-grade solutions, reducing technical debt across the codebase.

Frontend Developer | NKB PlayTech Pvt. Ltd - Jaipur, Rajasthan.

Sep 2023 - Jan 2026

- Built and maintained a production-scale gaming platform with 8+ interactive games using React.js, Node.js, TypeScript, Java, MongoDB, Firebase, and Supabase; handled high-volume user traffic, complex game logic, and real-time WebSocket state management.
- Optimized frontend rendering via React.memo, useCallback, and code splitting; designed scalable backend architectures and resolved critical production issues to deliver reliable, high-performance gaming experiences with sub-100ms response times.
- Accelerated feature delivery and debugging using Cursor AI, Google AI Studio, and Antigravity; managed sprint planning, bug tracking, and cross-team collaboration via Jira in an Agile/Scrum workflow.

React.js Developer Intern | Celebal Technologies - Jaipur, Rajasthan

May 2023 - Jul 2023

- Developed 10+ reusable React.js functional components using React Hooks (useState, useEffect, useCallback) for scalable web applications following clean code, DRY, and SOLID design principles.
- Implemented fully responsive UI layouts using CSS Grid, Flexbox, and media queries, achieving pixel-perfect, cross-browser-compatible designs across all devices; participated in code reviews and Agile sprint practices.

KEY PROJECTS

Coin Flip | Real-Time Multiplayer Game *React.js, TypeScript, WebSockets, Redux Toolkit, Node.js, MongoDB* | NKB PlayTech

- Architected a real-time multiplayer coin flip game with WebSocket-based live state synchronization supporting concurrent players at less than 50ms latency; implemented two game modes with event-driven Redux Toolkit state management and server-side tamper-resistant outcome validation for fair gameplay integrity.
- Designed modular React component architecture, reducing UI render latency by 30%; integrated REST APIs for game session management, player stats, and live score updates, ensuring a seamless and reliable multiplayer experience at production scale.

Triple Game | Tile Matching Puzzle *React.js, TypeScript, CSS3, Firebase, Node.js* | NKB PlayTech

- Engineered a high-performance tile matching puzzle using React.memo and useCallback to reduce unnecessary re-renders by 35%; built a fully modular, reusable component system with mobile-first responsive layouts supporting all screen sizes and viewports.
- Integrated Firebase for real-time leaderboard updates and session persistence; implemented smooth game-state transitions and optimized CSS3 animations, delivering consistent 60fps interactions across both desktop and mobile devices.

More or Less | Number Prediction Game *React.js, JavaScript, Context API, Node.js, REST APIs* | NKB PlayTech

- Built an adaptive difficulty number prediction game with real-time visual feedback, 60fps UI interactions, and Context API state management; implemented REST API integration for score tracking, session persistence, and dynamic difficulty adjustment.
- Designed robust input validation and comprehensive edge case handling, ensuring production-grade UX reliability; structured responsive layouts using Tailwind CSS, achieving full cross-browser compatibility and seamless mobile usability.

Legiit | Freelance and Course Marketplace *React.js, Laravel, PHP, MySQL, AI Tools* | Aipxperts

- Resolved 20+ critical dashboard layout and performance bugs, improving page load speed and responsiveness; led PHP to React.js page migrations, delivering cleaner, faster, and more maintainable frontend interfaces for a U.S.-based freelance platform.
- Integrated AI-powered features and third-party APIs to enhance platform capabilities; refactored legacy codebase following clean architecture and SOLID principles, significantly reducing technical debt and improving long-term scalability and maintainability.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering, Jun 2020 - Jun 2024 | CGPA: 7.53 / 10

Global Institute of Technology, Jaipur, Rajasthan

Relevant Coursework: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, System Design
