

ARIN JOSHI

SOFTWARE ENGINEER

Ahmedabad, Gujarat | thakararinjoshi@gmail.com | arinjoshi.netlify.app/ | + 91 8290279001

Software Engineer with 3+ years of experience building scalable web applications using React.js, TypeScript, JavaScript, and the MERN stack. Experienced in developing real-time applications, multiplayer systems, interactive user interfaces, and high-performance frontend architectures. Strong knowledge of React Hooks, component-based architecture, state management, REST API integration, WebSocket communication, and responsive UI design. Proven ability to collaborate with backend teams, write clean maintainable code, optimize application performance, and deliver production-grade applications in Agile development environments.

AREA OF EXPERTISE

Frontend : React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Redux, Context API

State & Data: Redux, REST APIs, WebSockets **Tools:** Git, GitHub, CI/CD, Postman

Backend (Basic): Node.js, SQL **Core CS:** Data Structures & Algorithms and Problem Solving

PROFESSIONAL EXPERIENCE

Jr. Software Engineer at NKB PlayTech Pvt. Ltd - Jaipur **Mar 2025 - Mar 2026**

- Developed real-time multiplayer game interfaces using React.js, TypeScript, and modern JavaScript.
- Implemented WebSocket based state synchronization to enable live gameplay updates between multiple players.

MERN Developer at Kotibox Global Technologies - Jaipur **Sept. 2023 - Feb. 2025**

- Designed and deployed the company's first production website using the MERN stack.
- Built responsive user interfaces using Tailwind CSS, HTML5, and modern JavaScript.

React.js Developer Internship, Celebal Technologies - Jaipur **May 2023 - July 2023**

- Developed reusable React components for scalable web applications.
- Implemented responsive UI using CSS and media queries.

EDUCATION

Global Institute of Technology, Jaipur **June 2020 - June 2024**

- Bachelor of Technology - 7.53 CGPA

PROJECT'S

Coin Flip Multiplayer Game

- Built a real-time multiplayer game using React.js, WebSockets, and REST APIs with live state synchronization
- Developed multiplayer and instant play modes ensuring smooth, low-latency interaction

More or Less Game

- Developed a number prediction game using React.js & JavaScript with dynamic difficulty levels
- Designed a responsive UI for smooth and engaging gameplay

Triple Game – Tile Matching Puzzle

- Built a tile matching puzzle game using React.js with optimized UI rendering
- Created reusable components and responsive layouts

Legiit – Service & Course Provider Platform

- Improved dashboard UI/UX, fixed layout issues, and enhanced performance
- Resolved bugs and improved code quality using Cursor AI
